

To Whom it May Concern,

I just learned that the National Association of Broadcasters is trying to block XM from providing "XM Instant Traffic & Weather." I use this service when I travel to other areas of the country and need to plan my trip. It greatly increases my safety and I'm sure countless others. The ease of the system is the main draw. I never have to fumble around with the dial to find the right station and I never lose reception. I urge you to REJECT NAB'S PETITION 04-160. Thank you.
